# Abstract

- This project focuses on developing a Gas Agency Management System to manage gas agency operations in a digital way.
- In many agencies, records are maintained manually .It helps the agency owner to easily monitor cylinder stock, manage staff details, generate bills, and view reports.

# Content

1. Introduction (background of the industry or used based problem / task)
2. Literature Survey
3. Scope of the project
4. Methodology
5. Details of designs, working and processes
6. Results and applications
7. Conclusion and future scope
8. References and Bibliography

# 1. Introduction

- Gas agencies play an important role in supplying cylinders to households and businesses.
- In many small gas agencies, most of the work such as stock management, staff details, billing, and report maintenance is done manually using registers.
- Because of this, problems like data loss, calculation mistakes, and difficulty in tracking cylinder stock may occur.
- To solve these problems, we developed a Gas Agency Management System, which helps the agency owner to manage all operations digitally and efficiently.

# 2. Literature Review

- Before developing this system, we studied different gas agency management methods and existing systems.
- For this project, we visited a gas agency to understand how their daily operations are managed.
- We interacted with the agency staff and asked them several questions.

# 2.1. Literature Review

- **Survey Questions:**
- During our project survey, we visited a gas agency and asked the following questions:

1. How do you maintain cylinder stock records?
2. How do you manage staff information?
3. How do you record customer billing details?
4. How do you track empty and filled cylinders?
5. Do you maintain records manually or digitally?
6. What problems do you face with the manual system?

# 2.2. Literature Review

- **Survey Findings / Answers**
- From the survey, we found that:

1. Most gas agencies maintain records manually using registers.
2. Staff and billing details are stored in files or registers.
3. Tracking cylinder stock manually is difficult.
4. Searching old records takes more time.
5. Manual work may cause calculation errors.
6. A digital system can make the work easier and fastere.

# 3. Scope of the project

- The scope of this project is to provide a digital platform for managing gas agency activities.
- It allows the owner to manage cylinder stock, staff details, billing records, and generate reports easily.
- The system helps in improving accuracy, saving time, and reducing manual paperwork.

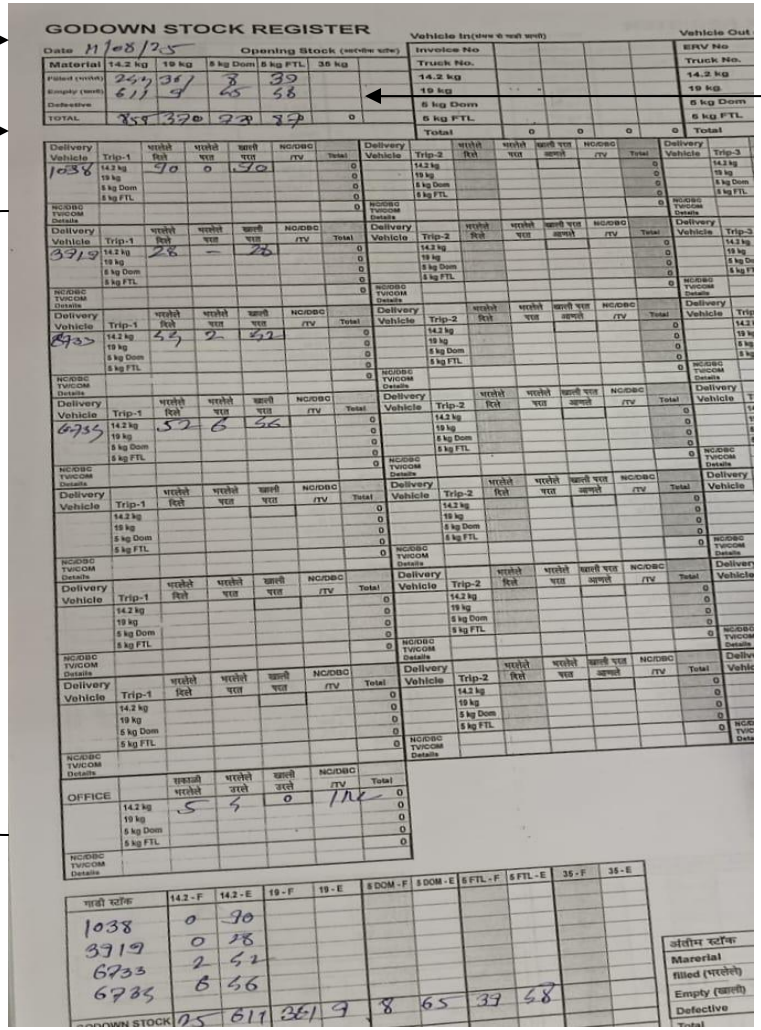
# 3.2 Study of existing system

- An Example of **Stock Record** maintained by the Gas Agency owner-

The date when the stock detail are recorded in the register.

The total number of a cylinder available in the godown at the beginning.

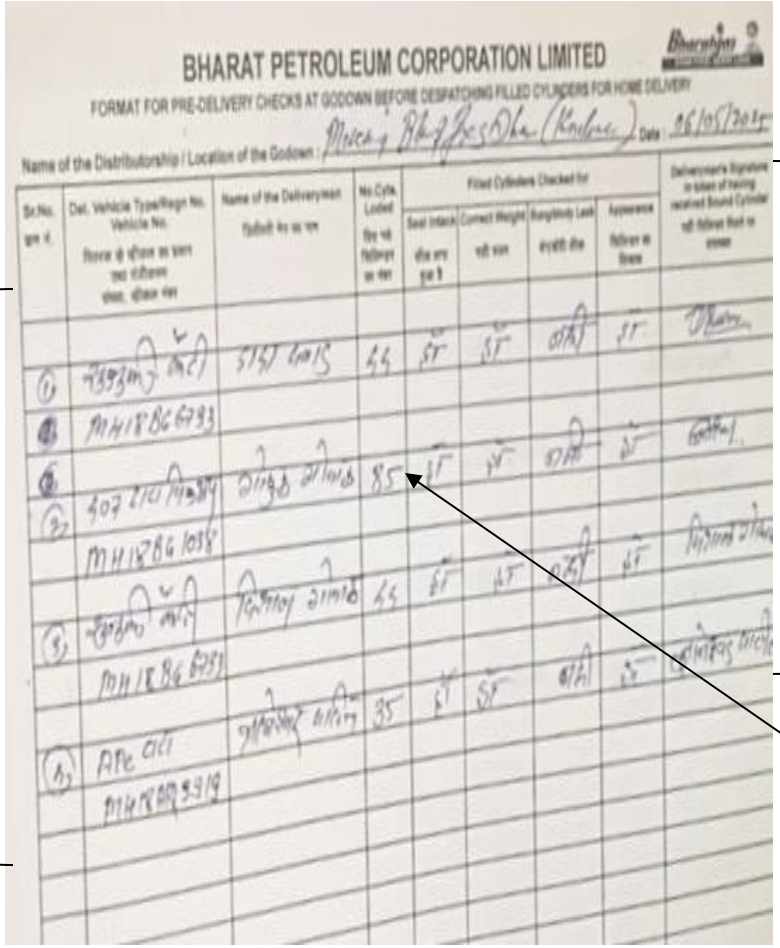
All stock data store columns All daily data stores in this columns.



It show the type of cylinder such as field empty.

# 3.3 Study of existing system

- An example of **Staff Record** maintained by Gas Agency owner-



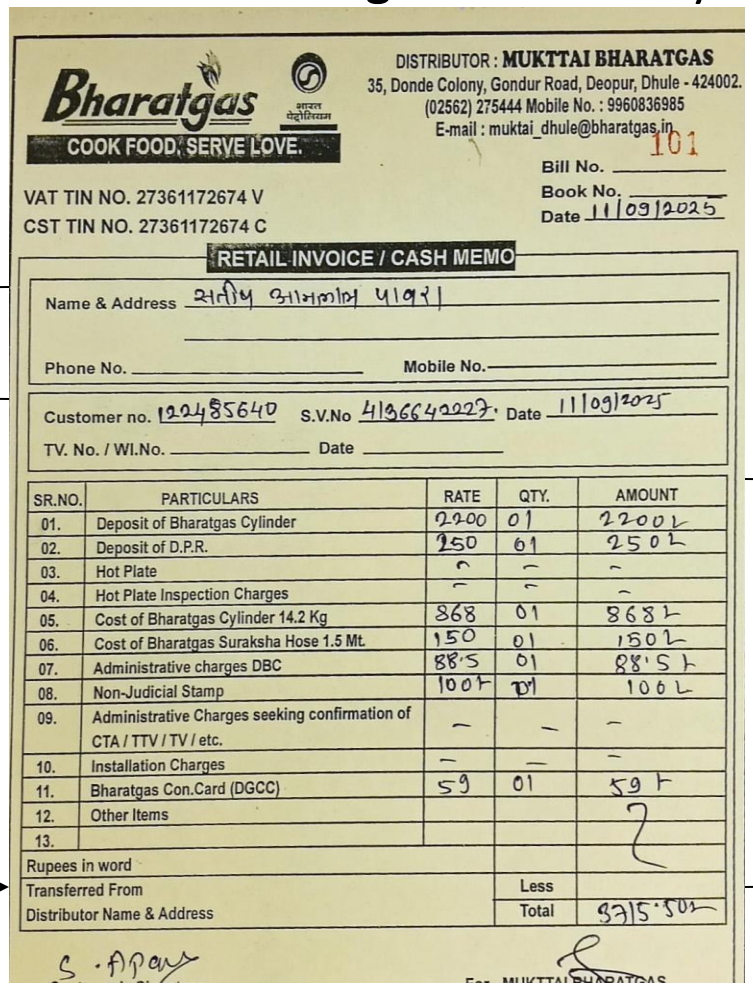
The name of delivery staff.

This section shows the signature of delivery staff.

How many cylinder assign to the delivery staff

# 3.3 Study of existing system

- An example of **new connection billing** maintained by a owner-



Bharatgas

S. A. Pawar

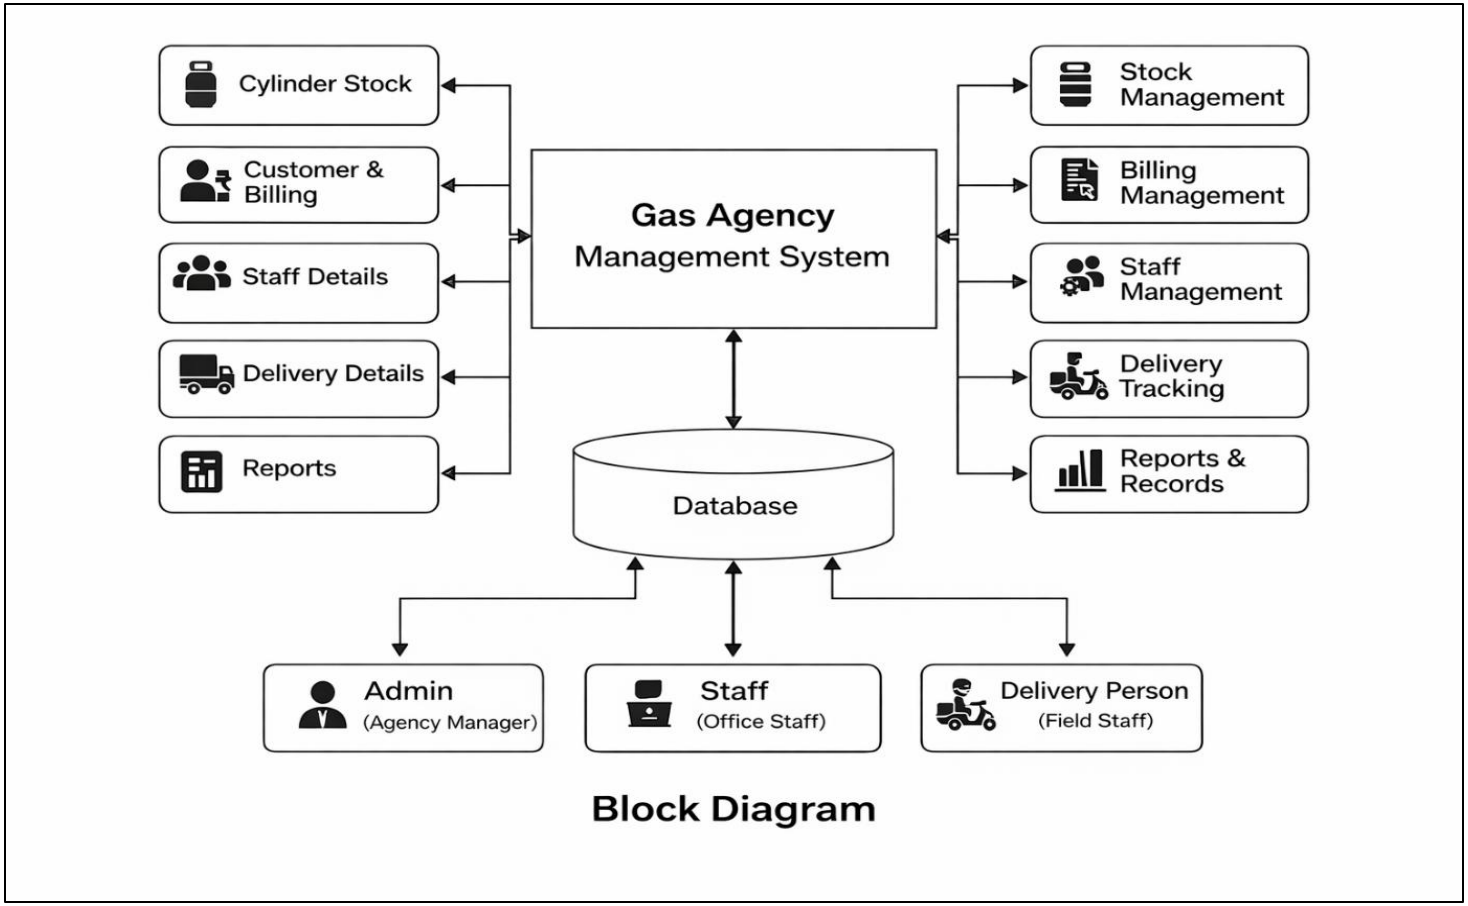
For MUKTTAI BHARATGAS

In the current system customer detail such as name , address , and customer number are written.

The details of LPG cylinder , hose pipes , other service charges.

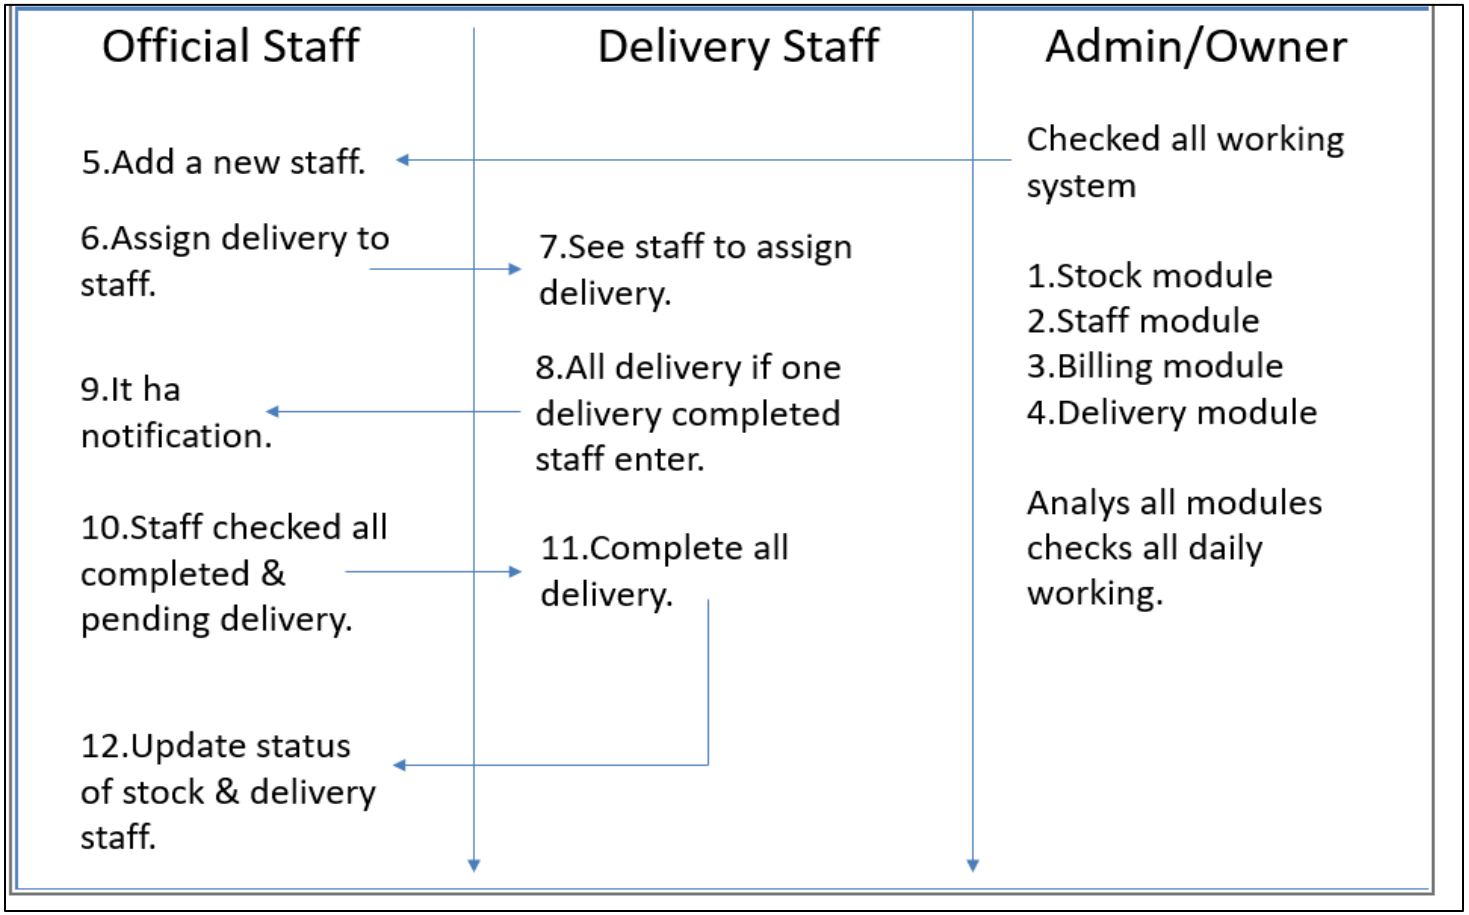
The rate , quality , total amount are calculated manually for each item.

- Block diagram of system:



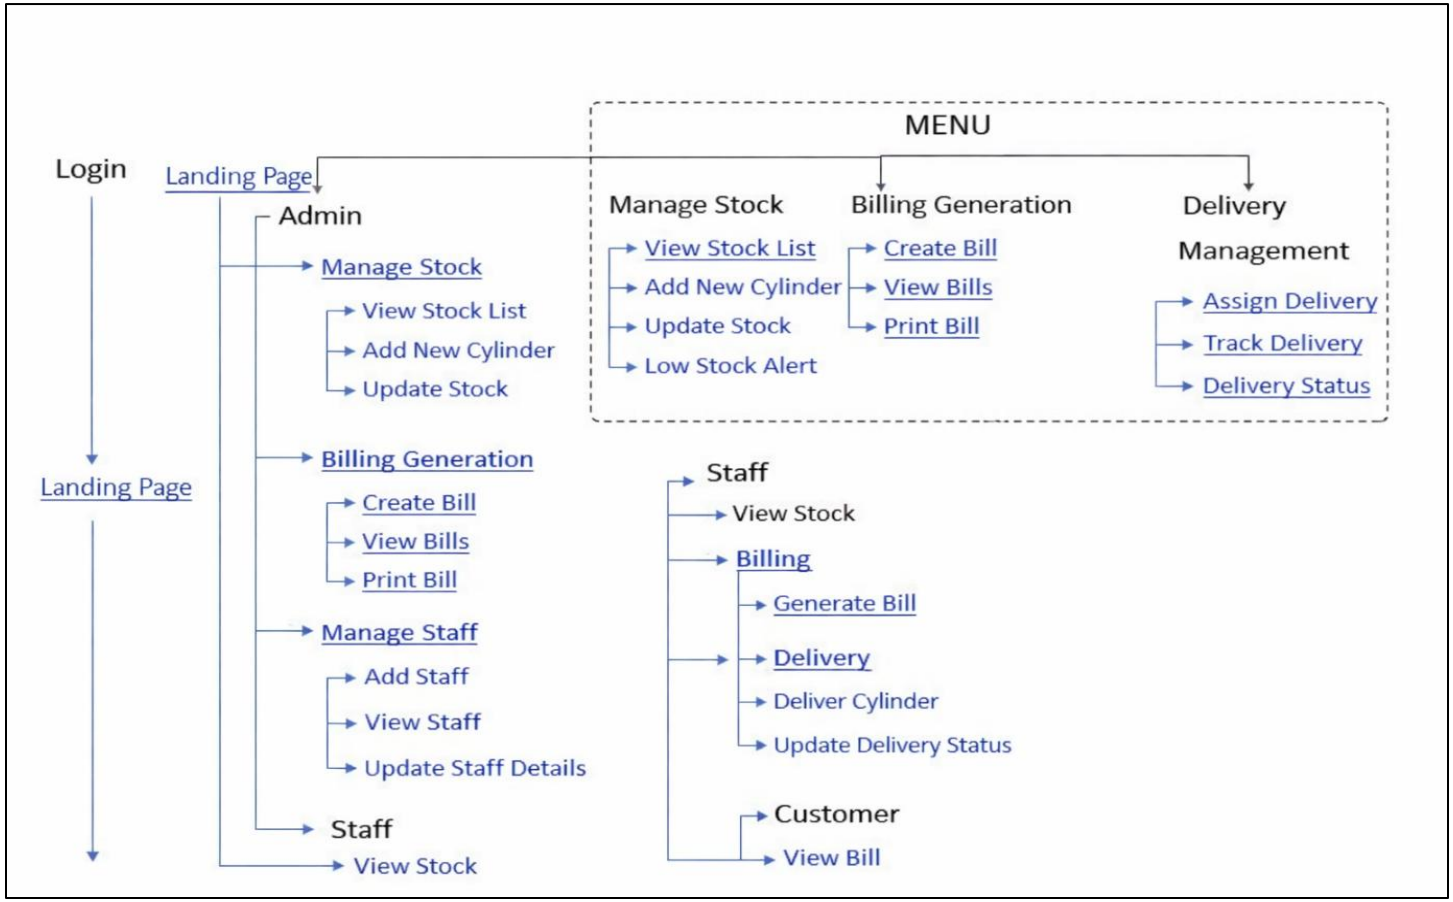
# 5. Details of designs, working & processes

- System flow diagram:



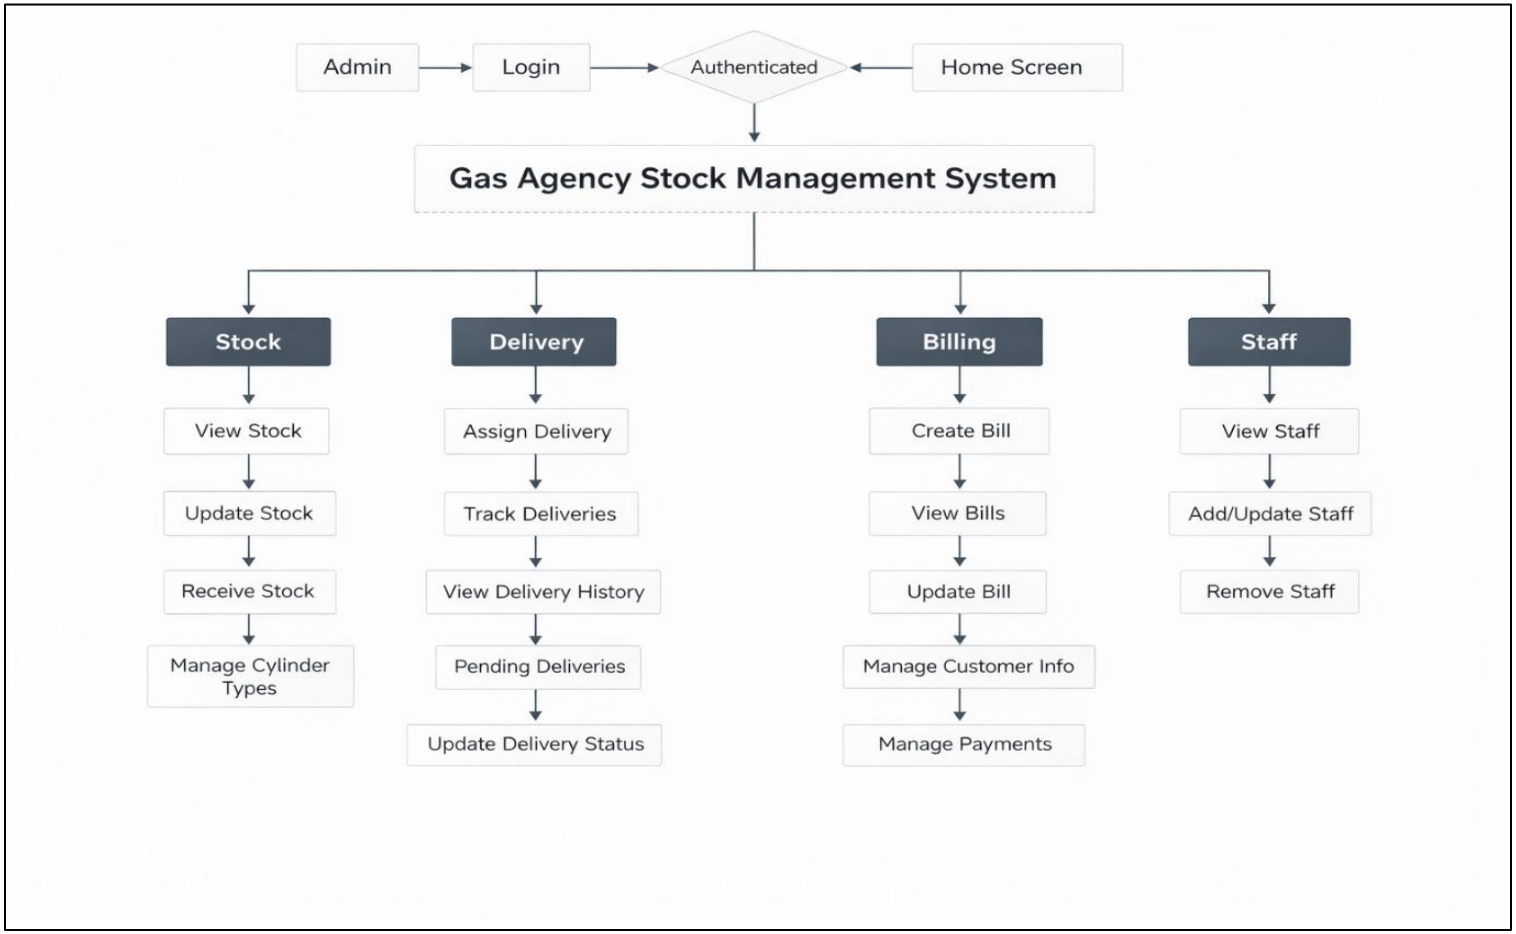
# 5.1 Site Map

- Site Map:



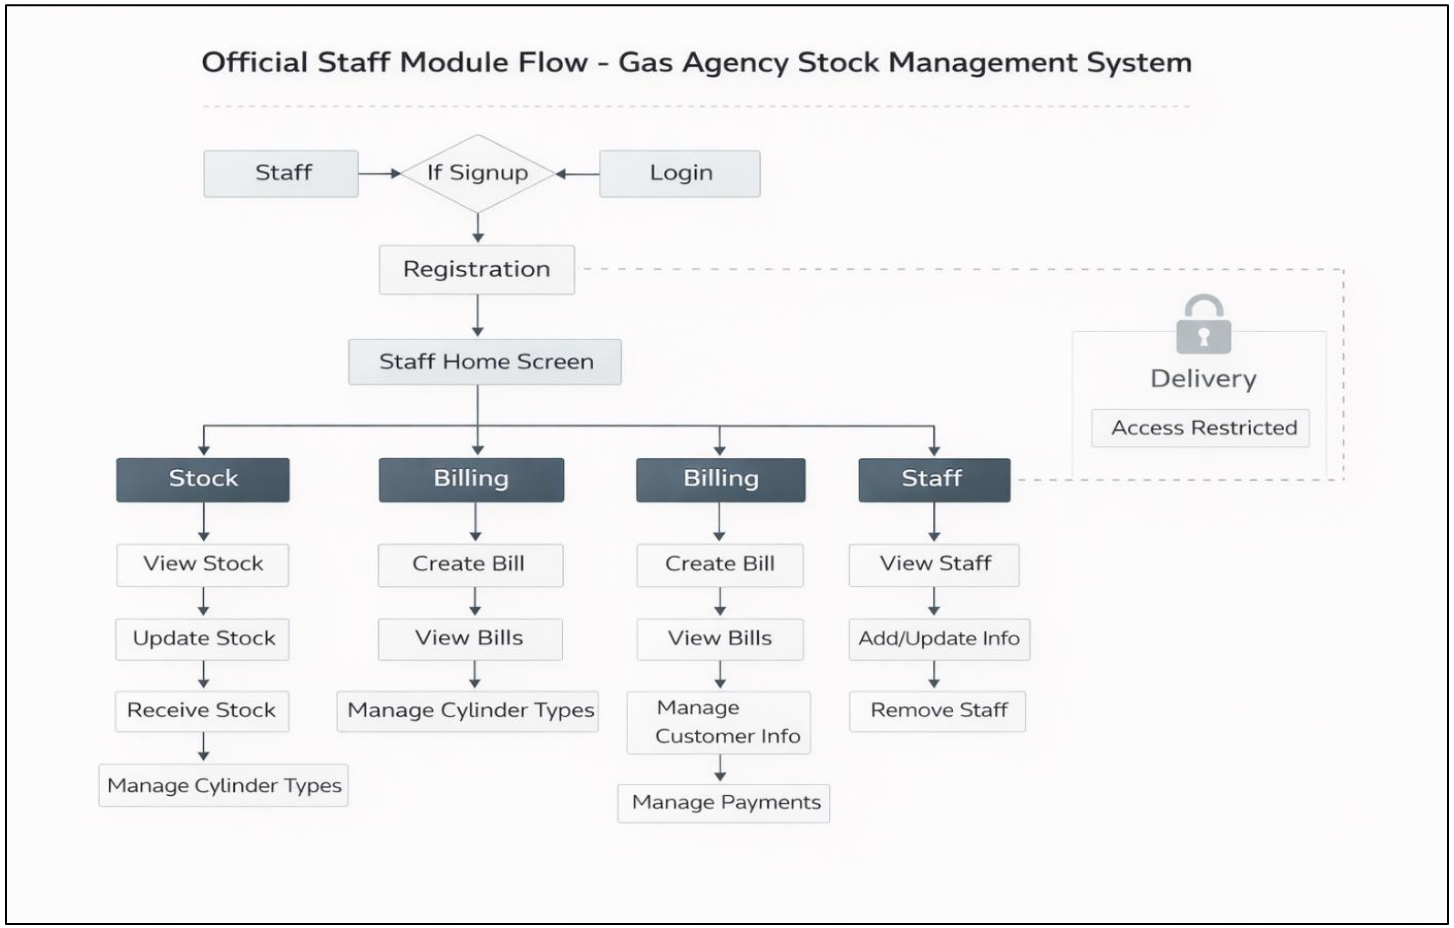
# 5.2 Admin Module Flow

- Admin Module:



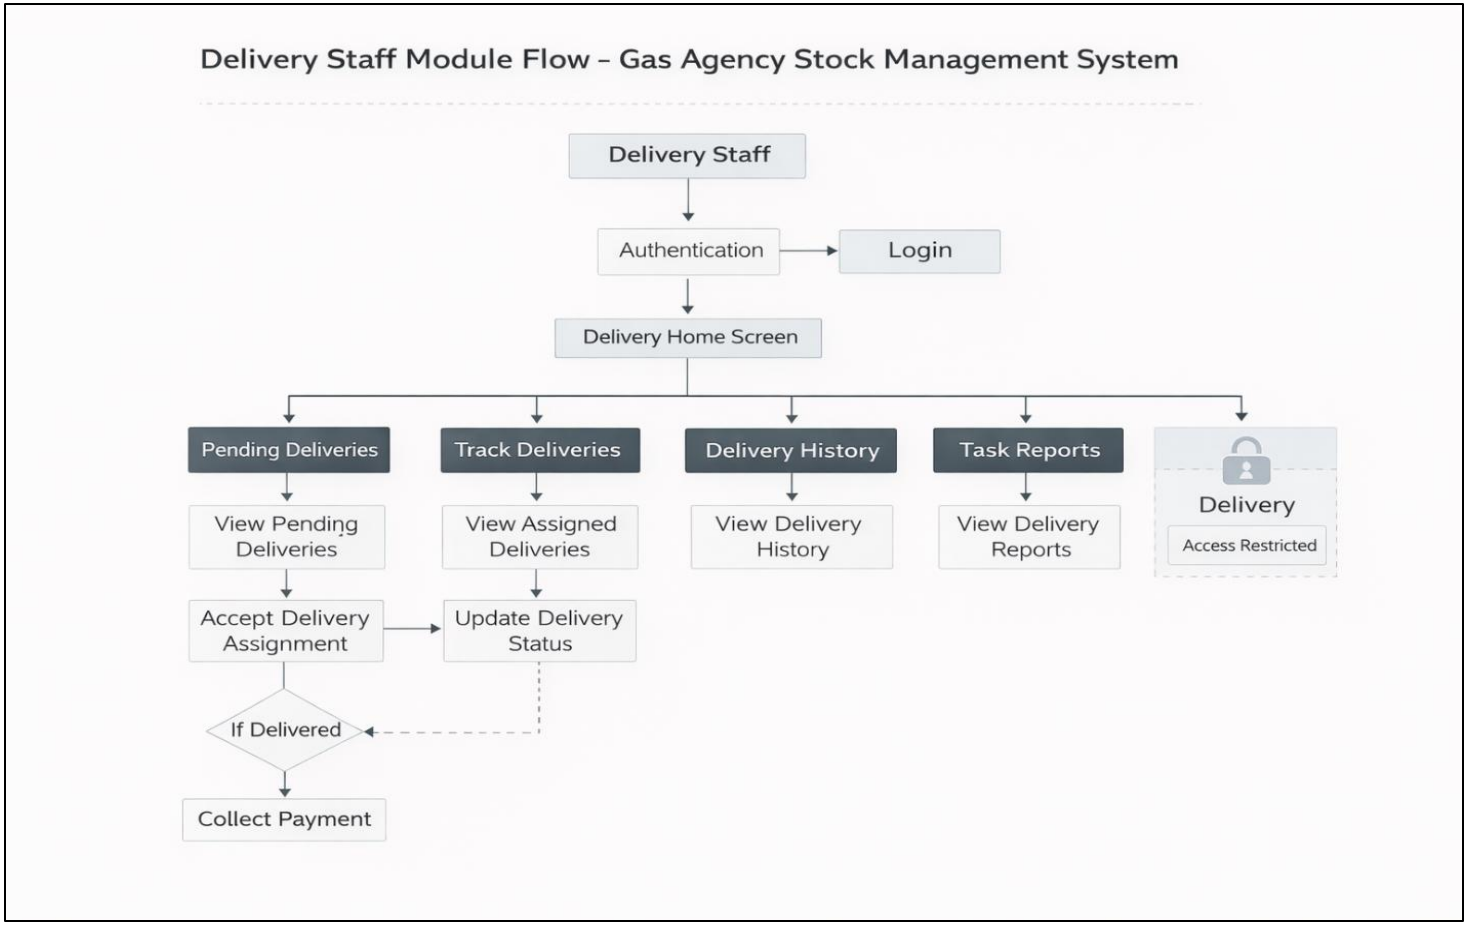
# 5.3 Official Staff Module Flow

- Official staff:



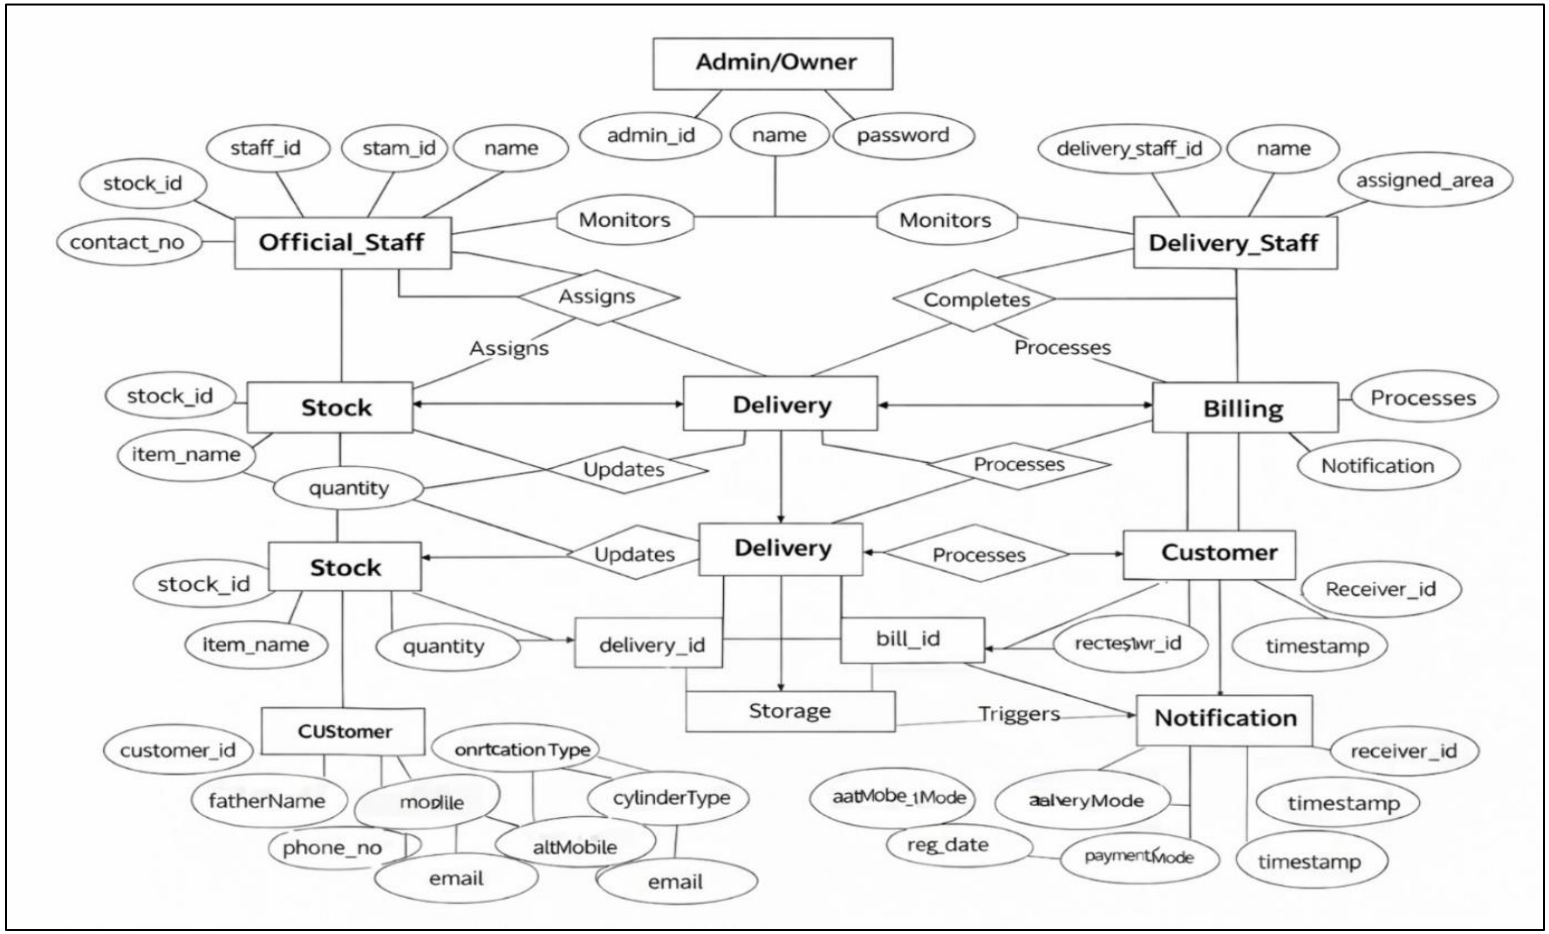
# 5.4 Delivery Staff Module Flow

- Delivery Module:



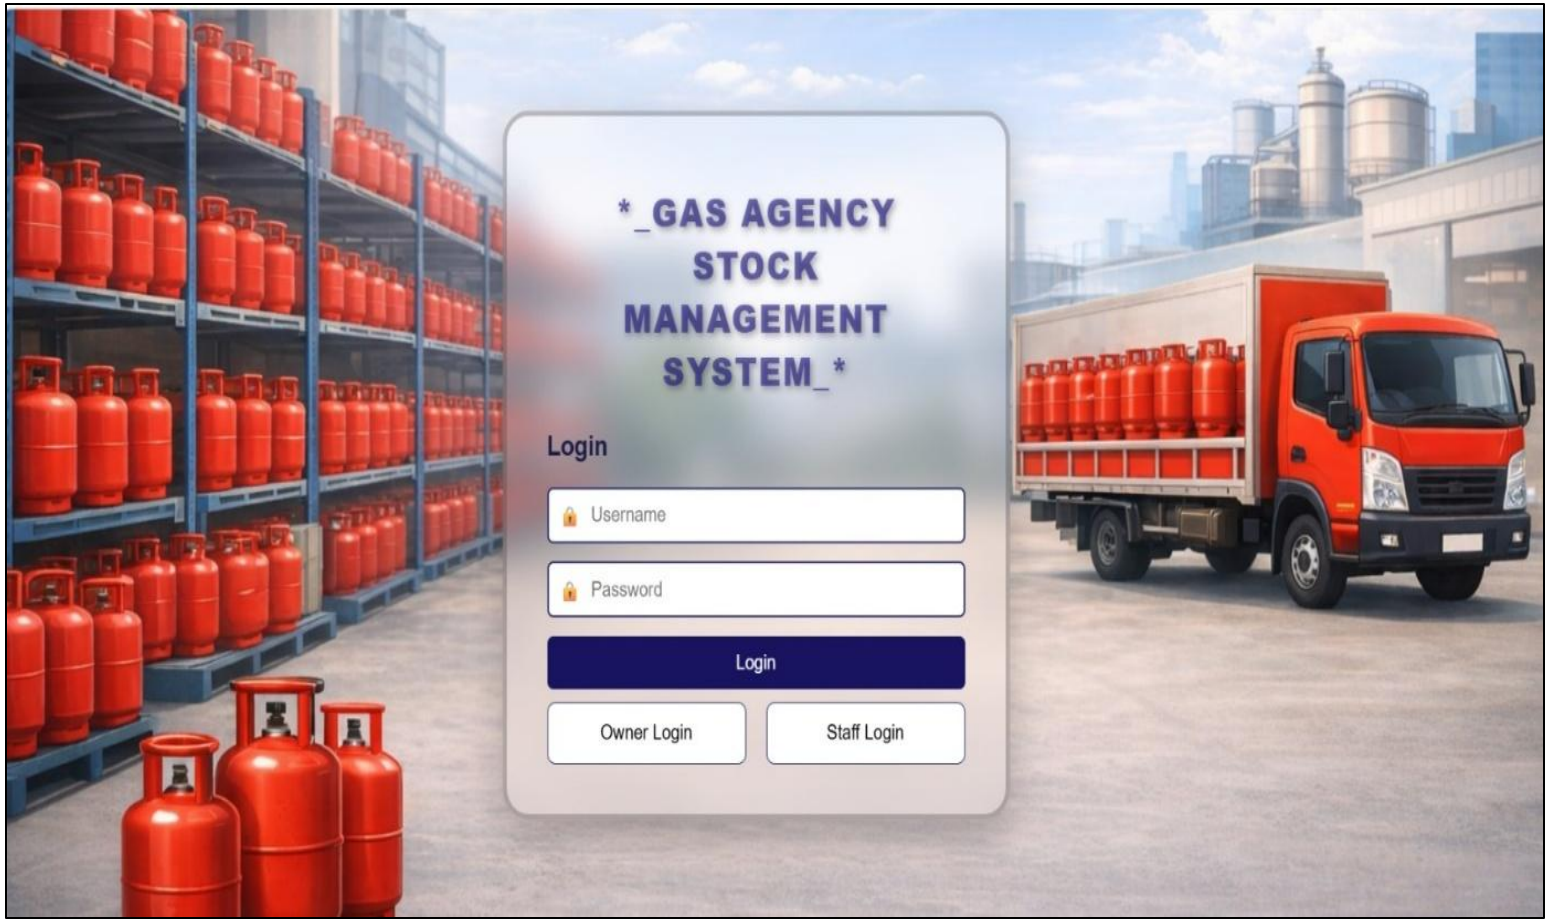
# 5.5 Er Diagram

- Er diagram of gas agency stock management system:



# 6 Result

- 2.Login Page(Owner , Official staff , Delivery staff).



# 6.1 Result

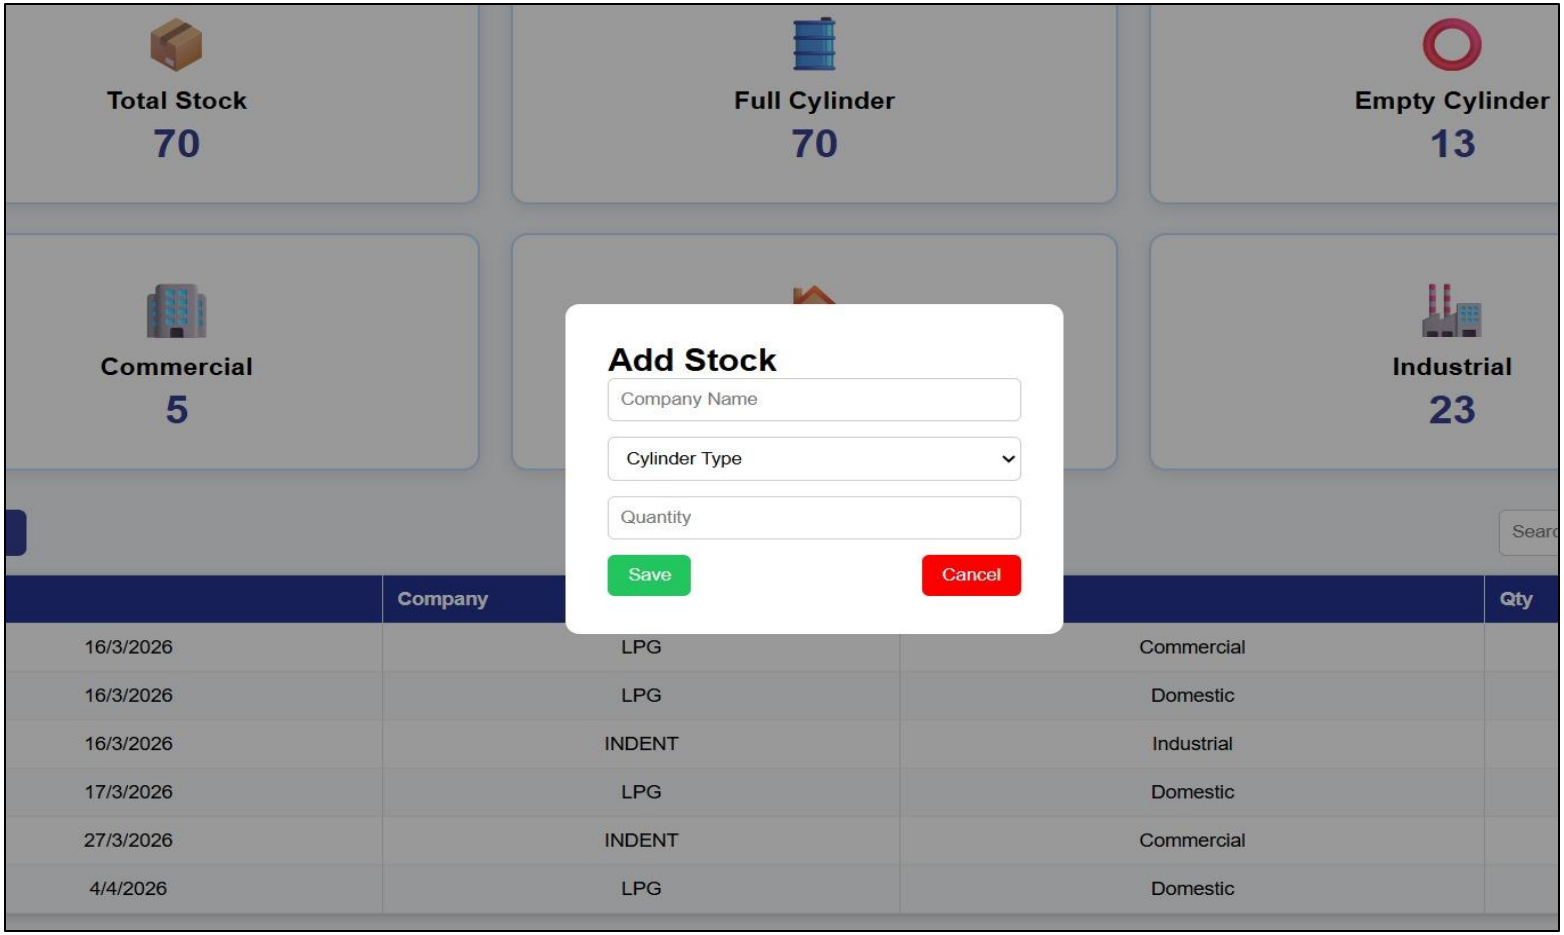
- Admin ,Official staff ,delivery staff

# 6.2 Result

- Stock Module.

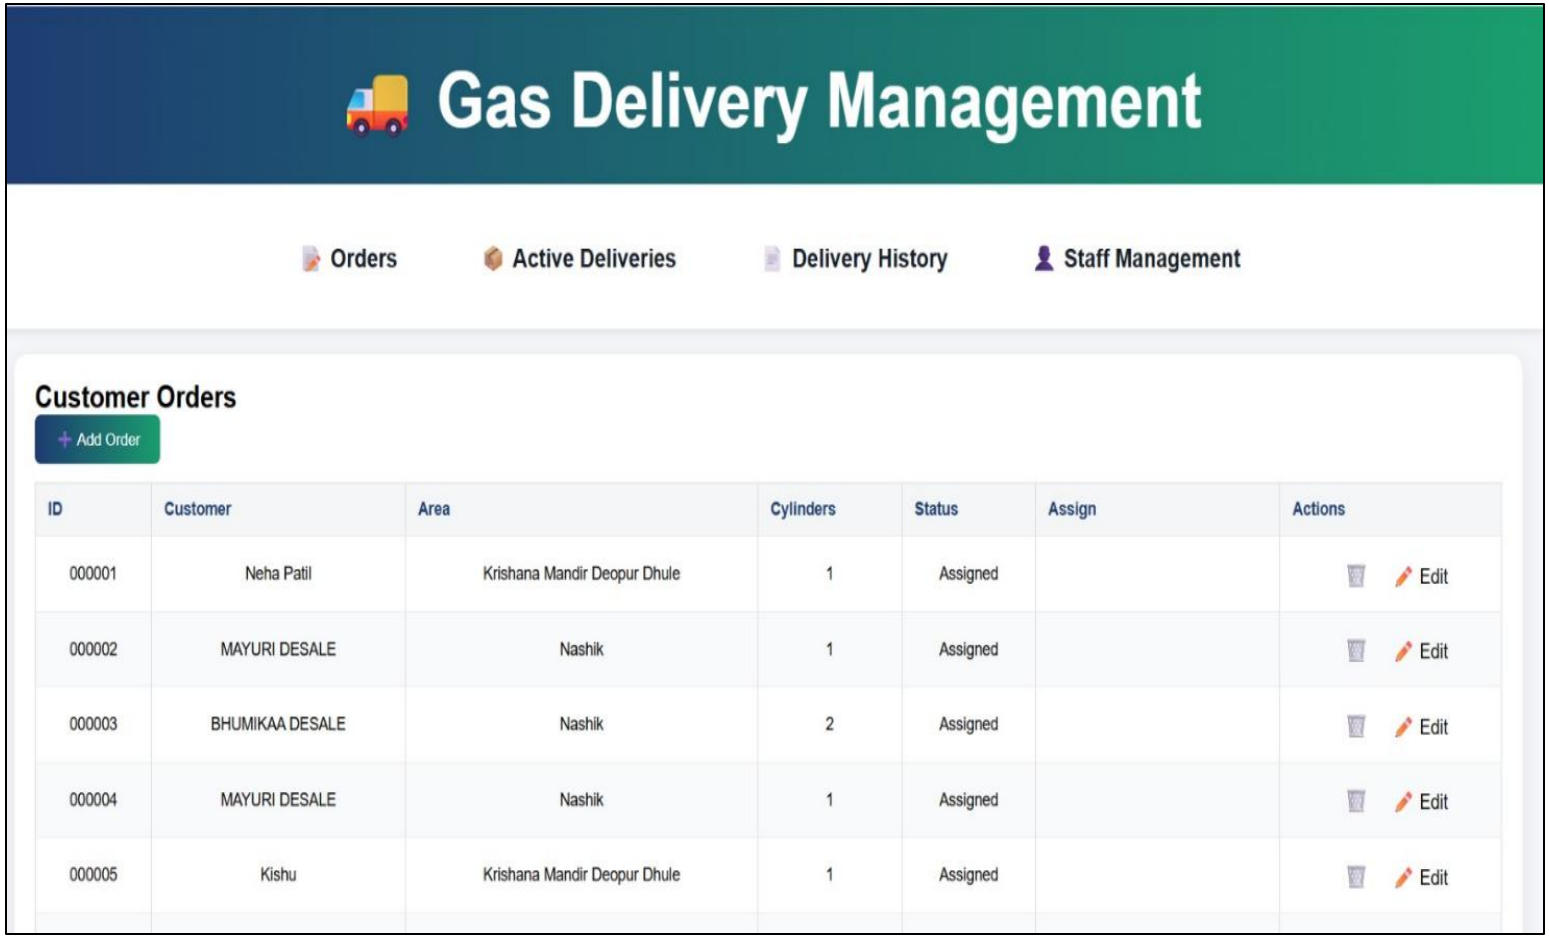
# 6.3 Result

- Add Stock From Web Page for Admin :



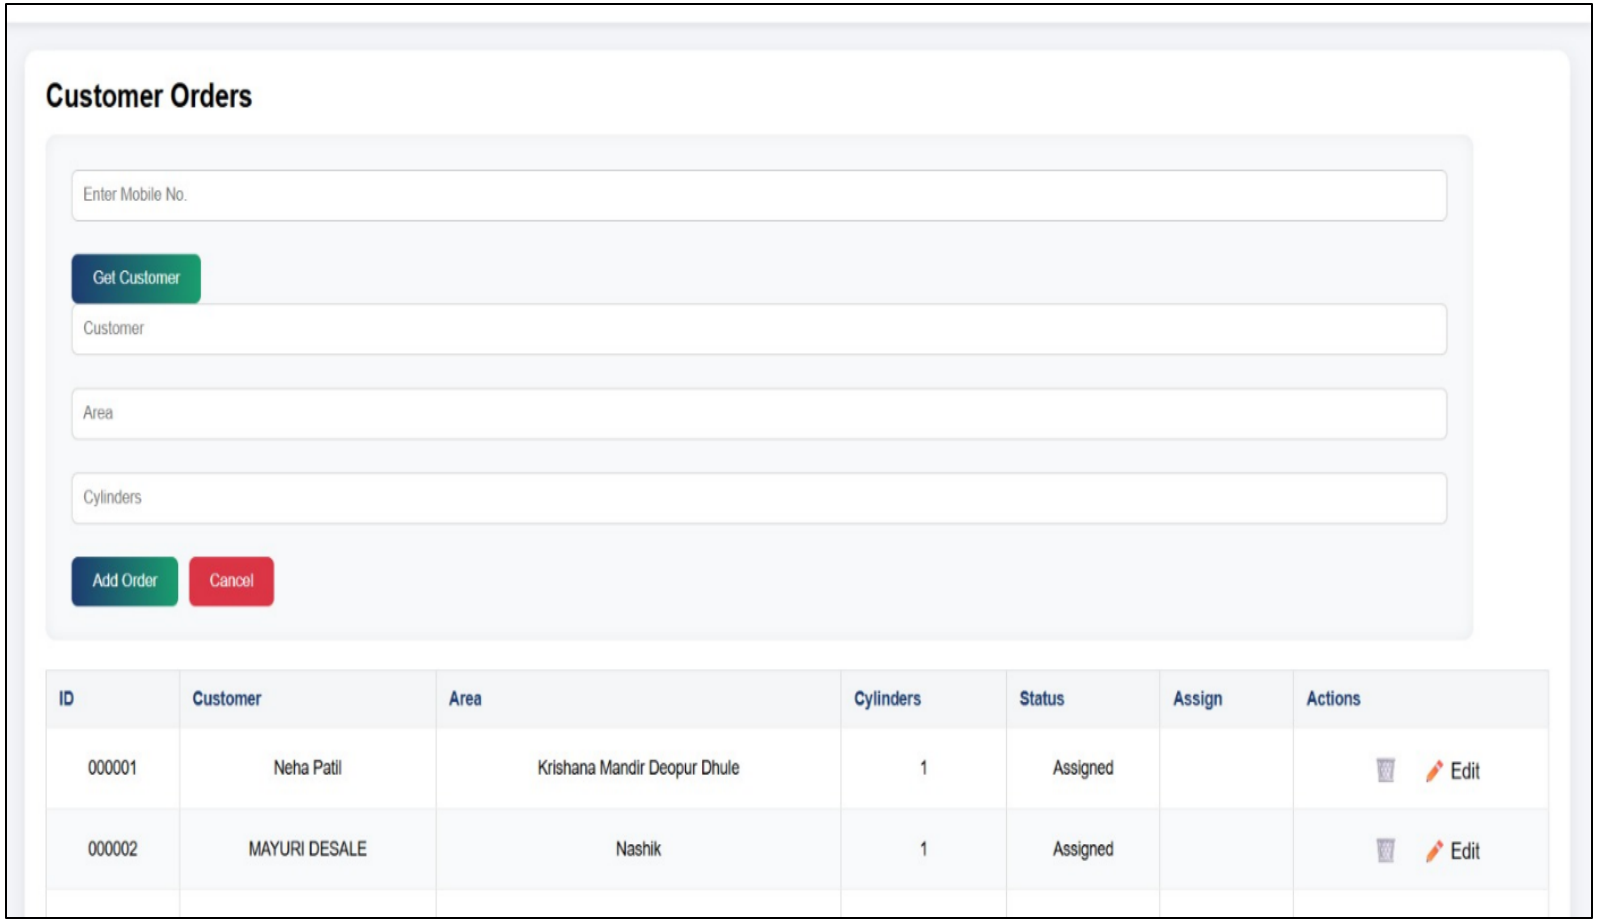
# 6.4 Result

- Delivery Management Module.



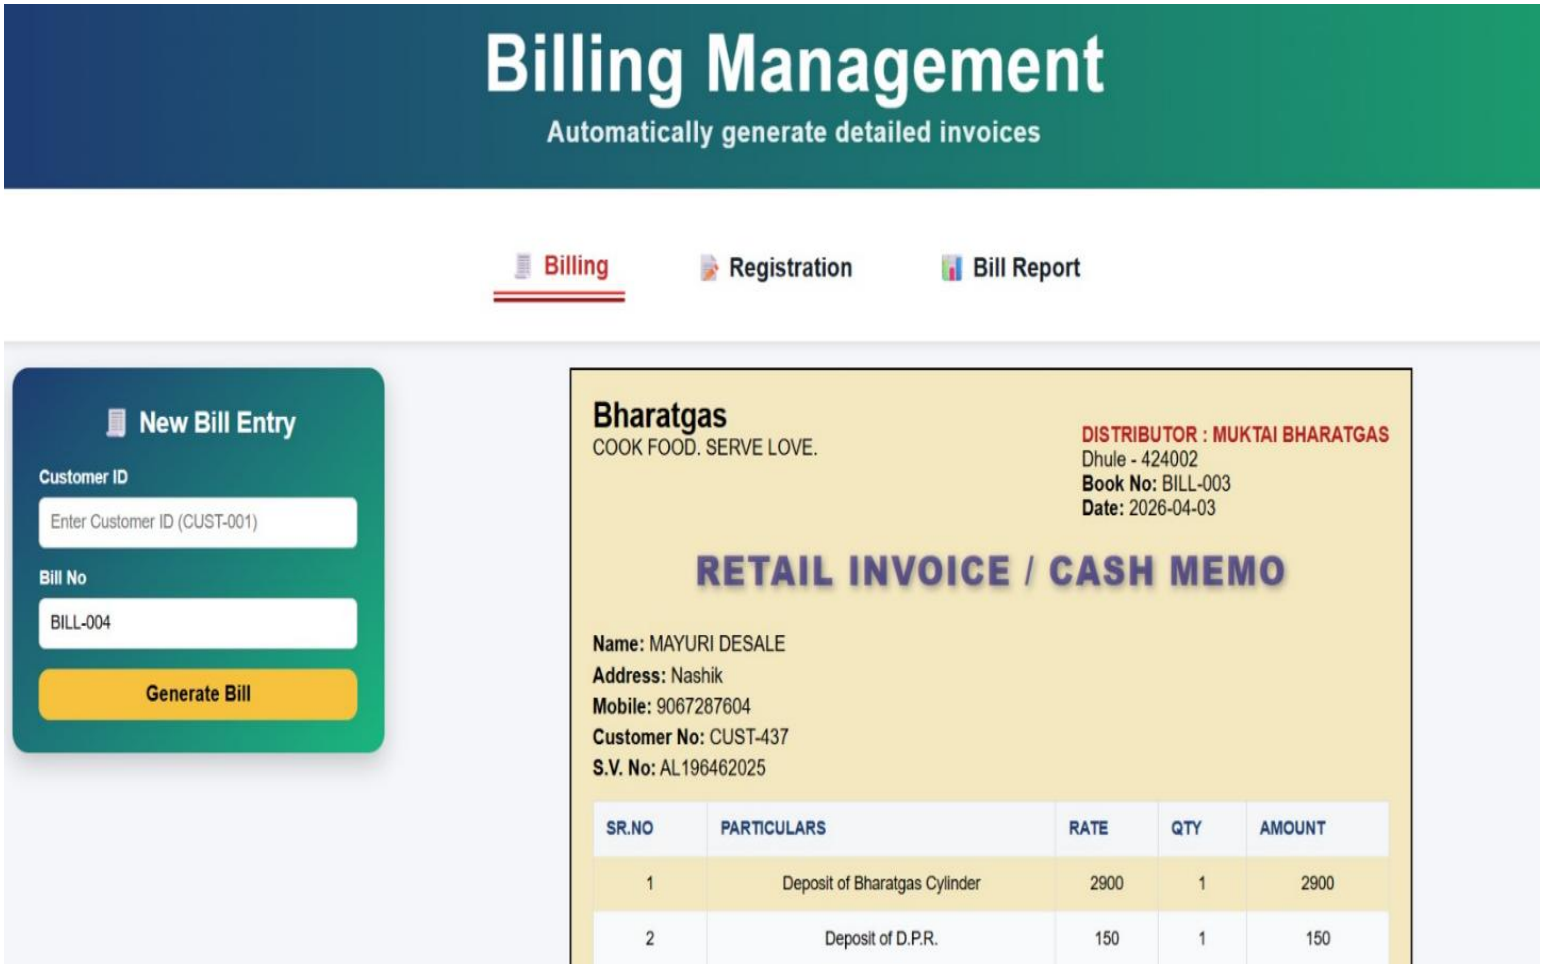
# 6.5 Result

- Add Customer Orders From Web Page for Admin :



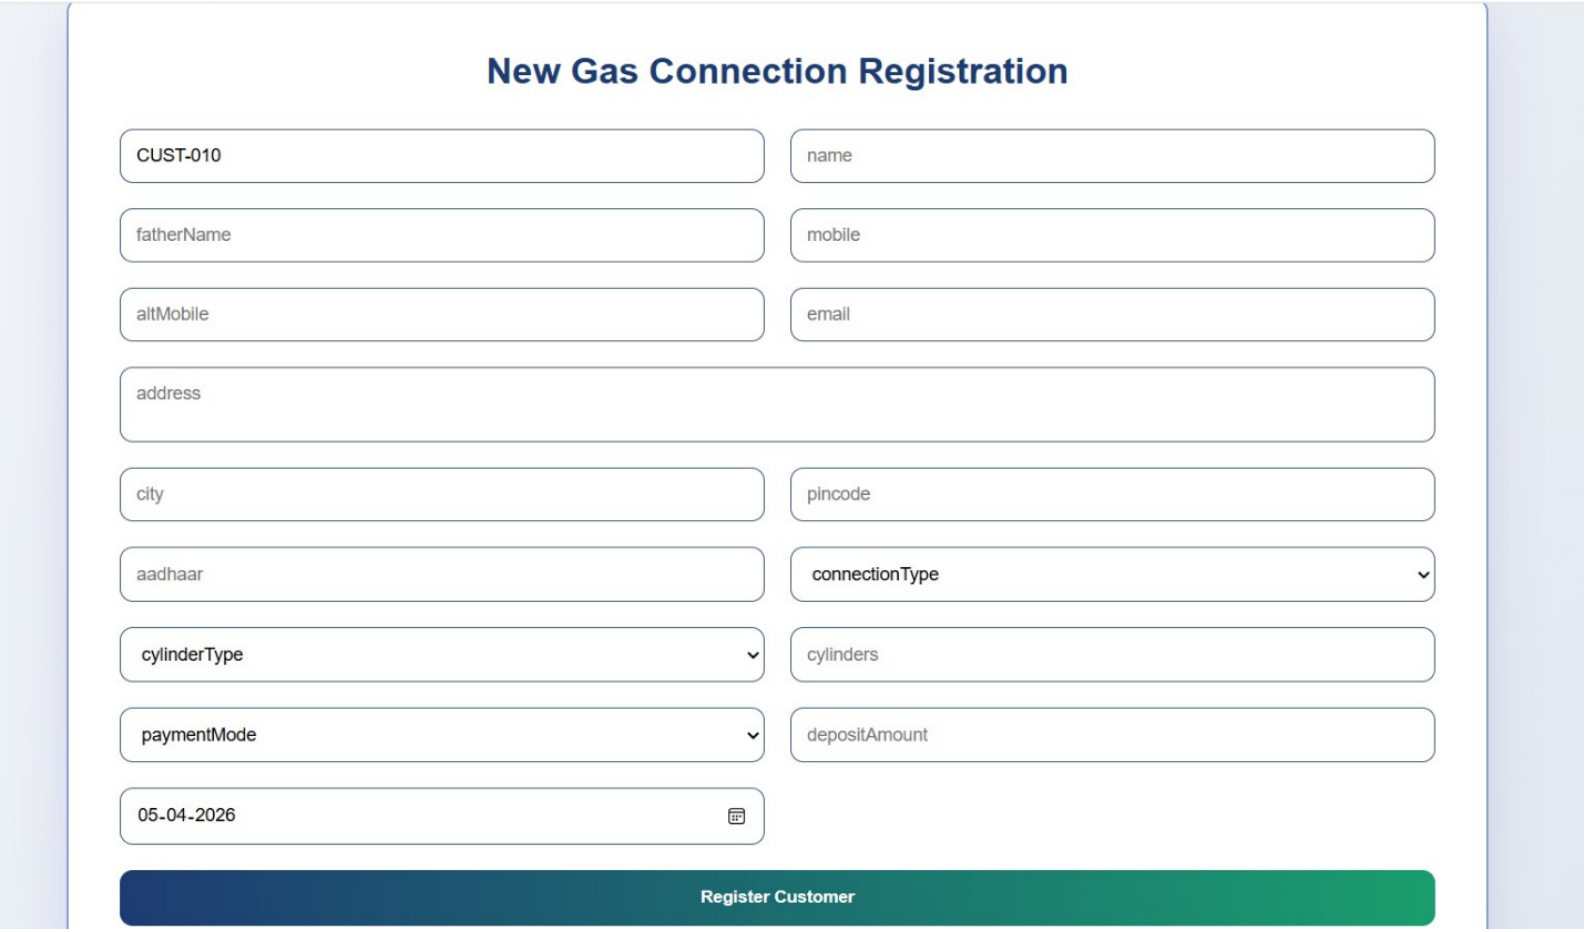
# 6.6 Result

- Billing Management Module:



# 6.7 Result

- Registration Customer for New Connection From Web Page for Admin :



# 7.Applications

Applications:

- Useful for small and medium gas agencies to manage daily operations.
- Helps agency owners maintain proper records of stock, staff, and billing.
- Improves work efficiency by reducing manual paperwork.
- Makes report generation and data management faster and easier.

# 8. Conclusion

- We seen that Gas Agency stock management system is able for completion of project phases from start to end successfully, it includes creation , planning ,monitoring.

# 8.1 Future scope

- The future scope of the gas agency stock management system is to improve the system by adding more advance features.
- Online Booking System : Customer will be able to book gas cylinder online through the website.
- Online Payment Integration : Customer can make payment using UPI , debit card.

# 8. References and Bibliography

1. Internet resources and technical websites
2. Online tutorials and documentation
3. Study materials related to web development
