Presentation on Capstone Project Execution (CPE–316004)

Topic	Rural E-commerce and Logistics	
Presented by	1. Devangi Pravin Bhamare	
	2. Manasi Devidas Chavan	
	3. SohelKhan MushirKhan Pathan	
	4. Siddharth Prakash Wagh	
Guided by	Mr. A.V.Agrawal	
Semester	**Sixth (K Scheme)**	**Date :07-03-2026**

Abstract

- The Rural Artisan E-Commerce and Delivery Platform is designed to support village craftsmen in selling their handmade products, including clay items, iron tools, wooden crafts, and traditional handicrafts. Many artisans in rural areas face limited market access and depend on middlemen, which reduces their earnings. This platform provides an online marketplace where artisans can directly showcase and sell their products to customers. Customers can browse items, place orders, make secure online payments, and track deliveries. The main goal of the project is to promote rural talent, increase artisan income, reduce dependence on middlemen, and create employment opportunities in villages. By bridging the gap between traditional craftsmanship and modern digital markets, the platform contributes to economic growth and digital empowerment in rural areas.

2. Literature Survey
3. Scope of the project
4. Methodology
5. Details of designs, working and processes
6. Results and applications
7. Conclusion and future scope
8. References and Bibliography

1. Introduction

- In many rural areas, skilled artisans craft high-quality handmade products such as clay items, iron tools, wooden crafts, and traditional handicrafts, preserving cultural knowledge passed through generations. Despite their talent, limited market access, lack of digital exposure, and dependence on middlemen often result in low profits, restricting income growth and threatening the continuity of traditional crafts. The rapid growth of e-commerce and digital technologies presents an opportunity to connect artisans directly with customers, eliminate intermediaries, ensure fair pricing, and expand market reach. At the same time, customers benefit by accessing authentic handmade products directly from the source.

2. Literature Review

- The growth of e-commerce platforms has significantly changed the way products are marketed and sold. Digital marketplaces allow small-scale producers and rural artisans to reach a wider range of customers, reduce operational costs, and increase their profit margins by selling directly without intermediaries.
- Existing e-commerce models such as large-scale online marketplaces demonstrate the effectiveness of digital platforms in expanding customer reach and ensuring secure transactions. However, most commercial platforms primarily focus on branded or mass-produced goods rather than handmade rural products. This creates a gap where traditional artisans struggle to compete due to limited visibility, logistics challenges, and lack of technical support.

3. Scope of the project

- The **Rural Artisan E-Commerce and Logistics Platform** is designed to create a digital marketplace that connects rural artisans with customers in cities and towns. It promotes handmade products such as clay items, iron crafts, wooden products, and traditional handicrafts while reducing dependence on middlemen.
- The platform includes three main modules: **Customer, Artisan (Seller), and Admin**. Customers can register, browse products, place orders, make payments, and track deliveries. Artisans can create profiles, upload and manage products, update stock, view orders, and track their earnings. The Admin manages artisan approvals, verifies products, controls categories, monitors transactions, and maintains the overall system.

4. Methodology

- **Step 1: Admin Functions**

  Approve and manage artisan (seller) registrations.

  Verify and monitor product listings uploaded by artisans.

  Manage product categories and website content.

  Monitor customer orders and platform activities.

  Control and maintain the overall system.

- **Step 2: Artisan (Seller) Functions**

  Register and create artisan profiles.

  Upload, edit, and manage handmade products.

  Manage product stock and pricing.

  View and process customer orders.

4. Methodology

- **Step 3: Customer Functions**

  Register and manage customer accounts.

  Browse and search products by categories.

  Add products to cart and place orders.

  Make online payments.

- **Out-Scope**

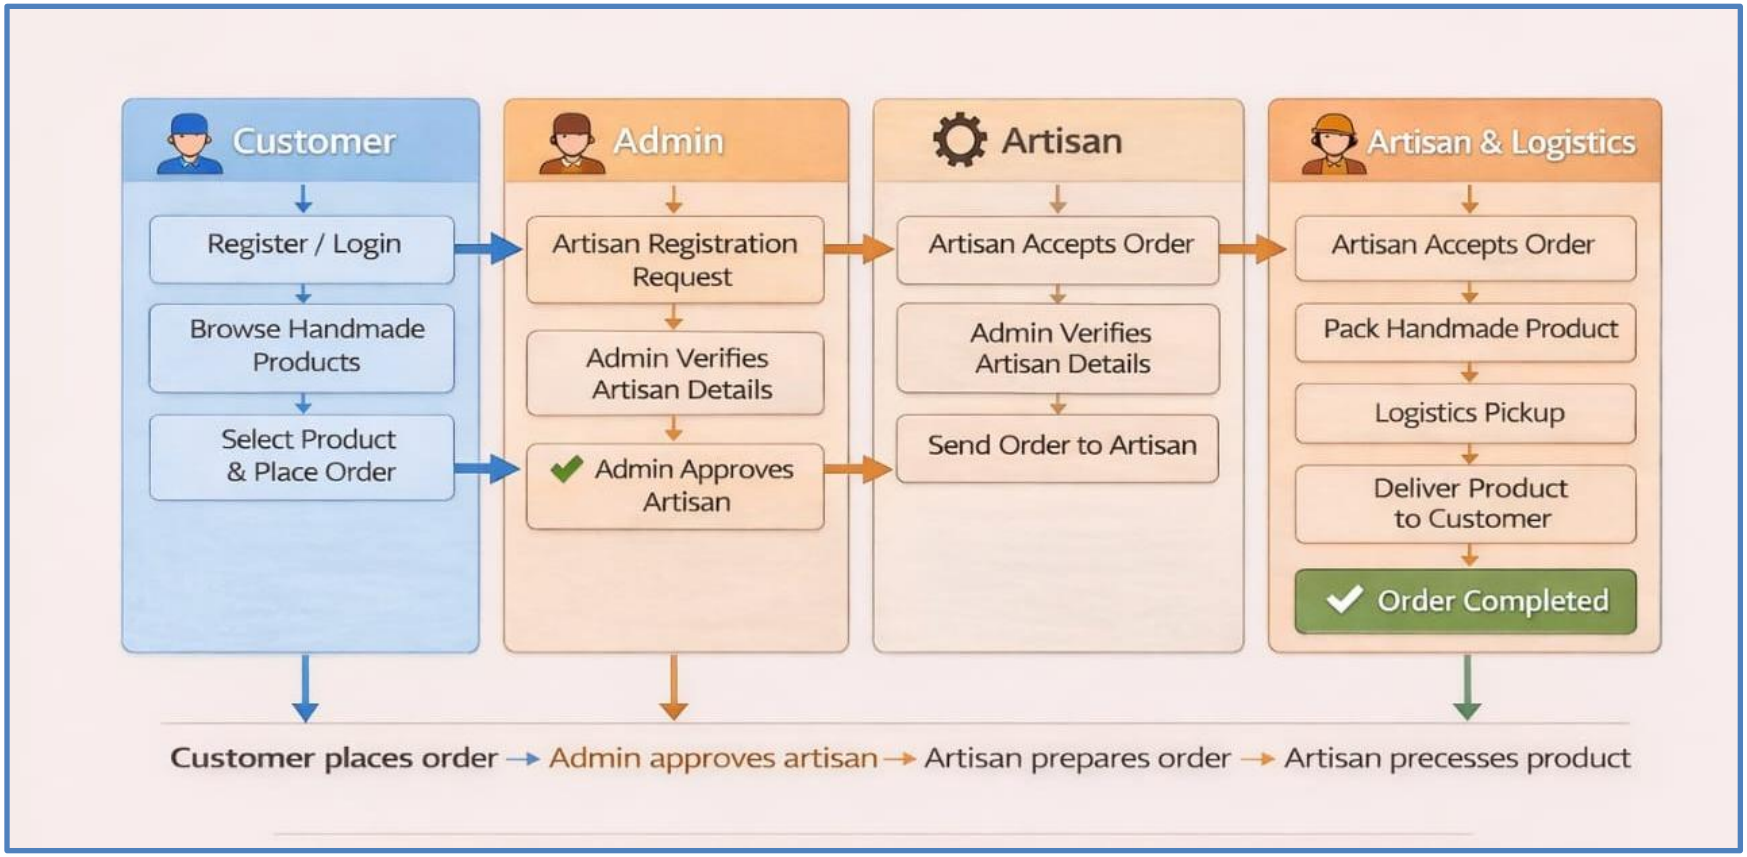
  Integration with external e-commerce platforms.

  International shipping system.

  Advanced AI recommendation systems.

  Fully automated logistics and warehouse systems.

5. Details of designs, working & processes



6. Results and Applications

- The Rural Artisan E-Commerce and Logistics Platform provides a digital solution that connects rural artisans directly with customers, enabling them to showcase and sell handmade products without relying on middlemen. Artisans can manage profiles, upload products, track orders, and monitor earnings, while customers can browse items, place orders, make payments, and track deliveries. The admin panel ensures proper system control, and basic logistics integration supports product pickup and delivery.
- **Application:**

Promotion of Handicrafts: Expands market reach for traditional crafts.

Direct Market Access: Reduces middlemen, increasing artisan profits.

Support for small Rural Businesses: Provides a digital selling platform.

7. Conclusion and future scope

- The **Rural Artisan E-Commerce and Logistics Platform** connects rural artisans directly with customers, enabling them to sell handmade products, reduce middlemen, and increase income. It also provides customers access to authentic crafts and ensures smooth order management and delivery. The platform supports rural economic growth, preserves traditional craftsmanship, and empowers communities through digital technology.
- **Future Scope :**

Develop mobile applications for wider accessibility.

Integrate advanced logistics and real-time order tracking.

Add secure, multiple payment options.

Support multi-language interfaces for regional iclusion.
