Abstract

The “SwadSakhi – Web-Based Homemade Food Platform” is designed to provide a simple and user-friendly platform for connecting homemade food sellers with customers. In today’s busy lifestyle, people prefer fresh, hygienic, and traditional homemade food, but finding trusted sellers is often difficult. This system provides a solution where users can easily browse and order homemade food products from different sellers.

The platform includes a variety of traditional homemade food items such as papad, pickles, snacks, and other items prepared with care and hygiene. It simplifies the process by providing features like user registration, product listing, category-based browsing, and order placement.
